CLIENT'S REQUEST

The client approached StaffingPartner with a critical need for a Senior System Architect. The role was pivotal for the client's upcoming projects and required a unique blend of technical expertise and leadership skills. Given the specialized nature of the role and the geographical focus, the client sought StaffingPartner's expertise in IT recruitment.

OUR APPROACH

The main challenge is that Senior Systems Architect is a rare position. Moreover, the client required 5+ years of Linux experience and 5+ years of system engineering experience.

Therefore, the pool of candidates needed to be expanded. With the recruiters' advanced boolean search capabilities and mastery of LinkedIn search, we assembled a high-quality talent pool for these specific needs.
